

August 31, 2022

Please join us on September 16th, 2022 at 8 am ET for the launch of International Geriatric Mental Health (I-GeMH) Rounds. Each block will be centred on a cutting edge topic in geriatric mental health.

Baycrest is partnering with the Canada International Scientific Exchange Program (CISEPO) and the Canadian Academy of Geriatric Psychiatry to host an international education series, with the goal of:

- Sharing tools and resources between sites
- Highlighting how the practice of geriatric mental health differs across the world, including its challenges
- Fostering a sense of connection between participants
- Emphasizing democratization of knowledge

Each expert led session will include a case. Advance questions are welcome and can be forwarded when you register through the link on the flyer.

Session topics for the 2022 series include:

September 16, 2022 Lewy Body dementia (Dr. Shabbir Amanullah, Canada)
October 21, 2022 Dementia prevention (Profs. Sebastian Kohler and Carol Brayne, UK)
November 11, 2022 Driving and dementia (Dr. Mark Rapoport, Canada)
December 9, 2022 TBD

Participants will receive a certificate of completion for attending the seminar(s). Please email us at psyched@baycrest.org to:

- Join the I-GeMH network and receive information about our upcoming educational opportunities
- If you have a tool or resource to share with our audience
- If you or a colleague are interested in presenting

Interactive videoconferenced sessions will be held live on Fridays between 8:00-9:00 am ET, where we hope to make recordings available.

Yours sincerely,

Cindy Grief, MD, FRCPC
 Staff Geriatric Psychiatrist, Baycrest
 Associate Professor, University of Toronto
 Department of Psychiatry
 Division of Geriatric Psychiatry
 I-GeMH Co-Chair

Christopher Kitamura, MD, FRCPC
 Staff Geriatric Psychiatrist, Baycrest
 Assistant Professor, University of Toronto
 Department of Psychiatry
 Division of Geriatric Psychiatry
 I-GeMH Co-Chair
